ACUPUNCTURE

## RELATIONAL ACUPUNCTURE® Our LIFE MANAGEMENT series

Relational Acupuncture® is a revolutionary concept in alternative medicine that bridges ancient healing traditions with the needs of modern life. Its focus is to create an environment where people achieve their health goals by using intention and relationship to align the body, mind and spirit.

We utilize acupuncture delivered in a community setting to transform an individual's health and to help them reach their goals, whether it be finding a new job or running a marathon. The collective group energy provides a powerful source for these acupuncture treatments to deepen healing and generate results at a faster pace.

The program is designed to help you achieve optimal health and live from your deepest potential. We teach you the power of intention to transform your health at its core. By using a combination of the spiritual (meditation and Qi gong), mental (intention) and physical (the ancient healing practice of acupuncture), you can reach optimal levels of health and well-being.

The most profound health changes require firm resolve and gentle, steady progress towards an outcome. It can be challenging to make lasting health changes without support—on both the mental and physical levels. Relational Acupuncture® will support you on your journey to optimal health.
